PROFESSIONAL SUMMARY

MSc Artificial Intelligence student at ECE Paris with a strong foundation in Computer Science and hands-on internship experience. Beyond technical development, I am a curious problem-solver who enjoys turning complex real-world challenges into simple, practical solutions. A collaborative team player with experience leading project groups and a dedicated focus on continuous growth in the field of AI.

EDUCATION

Master of Science in Artificial Intelligence

ECE Paris, France | Sep 2025 - 2027

Key Courses: Reinforcement Learning, Probabilistic ML, Distributed Systems, Multi-LLM Architectures.

Bachelor of Technology in Computer Science

SRM University, Chennai, India | Aug 2020 - Aug 2024

CGPA: 8.02 / 10

INTERNSHIP EXPERIENCE

Intern – MERN Stack Development

BrainOvision Solutions Pvt. Ltd. | Jul 2024 - Apr 2025

- Built scalable web applications using MongoDB, Express.js, React.js, and Node.js.
- Worked on real client projects and gained hands-on full-stack development experience.
- Recognized for being a quick learner and strong team contributor.

TECHNICAL PROJECTS

PowerSense AI - Real-Time Energy Prediction

Dec 2025 - Present

- Built ML models to predict real-time energy usage patterns for smart grid optimization.
- Created data pipelines using Scikit-learn and Pandas for fast and accurate feature engineering.
- Used hyperparameter tuning and cross-validation to improve model accuracy.

AI-Based Smart Energy Management System

Jan 2026 - Present

- Designed an AI monitoring system to reduce power usage in computer labs.
- Used ML algorithms to automate energy-saving recommendations and cut manual effort.

Retinal Disease Detection Using Deep CNN

- Built a CNN model to detect eye diseases like Glaucoma and Diabetic Retinopathy from retinal images.
- Used image preprocessing and edge detection to improve detection accuracy.
- Trained on 2000+ labeled fundus images achieving high classification performance.

Faulty Machine Prediction Using ML Algorithms

- Compared ML models (Naive Bayes, SVM, Decision Tree) to predict industrial machine failures.
- Preprocessed industrial time-series data and selected the best model for deployment.
- Reduced downtime and improved maintenance planning through failure probability estimation.

TECHNICAL SKILLS

Programming	Python, JavaScript, C, SQL
AI & Machine Learning	TensorFlow, Keras, Scikit-learn, CNN, Deep Learning, Reinforcement Learning
Data Engineering	Pandas, NumPy, Matplotlib, Feature Engineering, Data Preprocessing
Full Stack (MERN)	MongoDB, Express.js, React.js, Node.js, RESTful APIs
Cloud & DevOps	AWS, Google Cloud, Git, GitHub, Docker (Basics)
Tools	VS Code, Flask, Jupyter Notebook, PyCharm

CERTIFICATIONS

- **AI & Generative AI (GenAI) – Level 2** — DataScientest
- **Programming – Level 1 (English)** — DataScientest
- **MERN Stack Development** — BrainOvision Solutions Pvt. Ltd.
- **Deep Learning & AI** — Coursera

LEADERSHIP & ACTIVITIES

- Led and coordinated a team of 3-4 members across multiple university project cycles, ensuring timely delivery of technical milestones.
- Managed architectural design and code integration for team-based AI and web development projects.
- Represented project teams during final evaluations and defended technical design decisions to academic panels.
